

UNIVERSITY OF VERONA

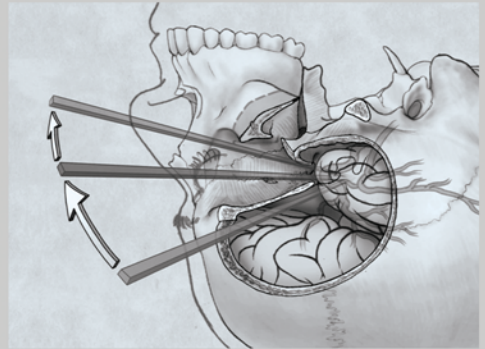

SECOND LEVEL MASTER'S COURSE 2017-2018

HANDS-ON SURGICAL APPROACHES TO THE ANTEROLATERAL SKULL BASE

The course provides comprehensive theoretical and practical instruction on surgical access to the anterolateral skull base, an anatomically homogenous region. This one-of-its-kind course features:

- One cadaver head per participant
- Three 3-day dissection courses on each of the following:
 - transcranial, pterional and variants
 - endonasal and median subfrontal
 - other approaches, including those directed to the orbit
- Continuity of learning throughout the year
- Continuity of instruction during intervals between courses
- Multidisciplinary faculty
- Range of techniques from microscopic to endoscopic
- Guided comparison of surgical approaches to the same intracranial area

The course will be held in collaboration with the **ICLO Teaching and Research Center Verona** and the **University Hospital of Verona**.

Course director:
Andrea Talacchi M.D.
(*Neurosurgery Verona*)
andrea.talacchi@univr.it

Applications for admission to the course will open in July 2017 and will be posted on **www.univr.it**
